

Academic Dishonesty

➤ What is cheating?

- Sharing code: by copying, retyping, looking at, or supplying a file
- Describing: verbal description of code from one person to another
- Tutoring: helping your friend or you being helped by someone else to write a program
- Copying code from a previous course or online solution
 - Searching the web for solutions
 - You are only allowed to use code supplied by the instructor/labs

➤ What is NOT cheating?

- Explaining how to use systems or tools
- Helping others with high-level design issues

➤ Ignorance is not an excuse

See the course
outline for details
(in Registrar Notes
section)

Academic Dishonesty - Consequences

- Penalty for cheating:

- Get 0 for lab task(s)
- Permanent letter in your record
- May perform poorly in lab quizzes!

- Don't do it!

- Start early
- Ask TA's and instructor for help when you get stuck

- Academic Integrity: your work, your success
